

The power of collaboration for a sustainable energy transition

Assopetroli-Assoenergia

Who we are

75+ years of history

Our Association was founded in 1949 and it is member of Confcommercio-Imprese per l'Italia and founding member of UPEI (the voice of Europe's independent fuel suppliers).

600+ members

Our members are over 600, but we represent over a thousand companies, with a total of 10,000 employees and over 17 billion in revenue.

Our organization

Our association is led by a board of directors consisting of a president and 4 vice presidents. Operational functions are ensured by the Secretary General and a team of professionals. Our headquarters is located in Rome (via San Martino della Battaglia, 25).

Fuel retail

About 60% of the retail stations in Italy

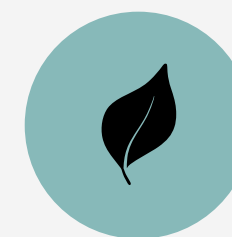

Fuel wholesale

Approximately 50% of the companies specialize in trading fuels for heating, agriculture, marine, aviation, and various other sectors.

Energy efficiency services

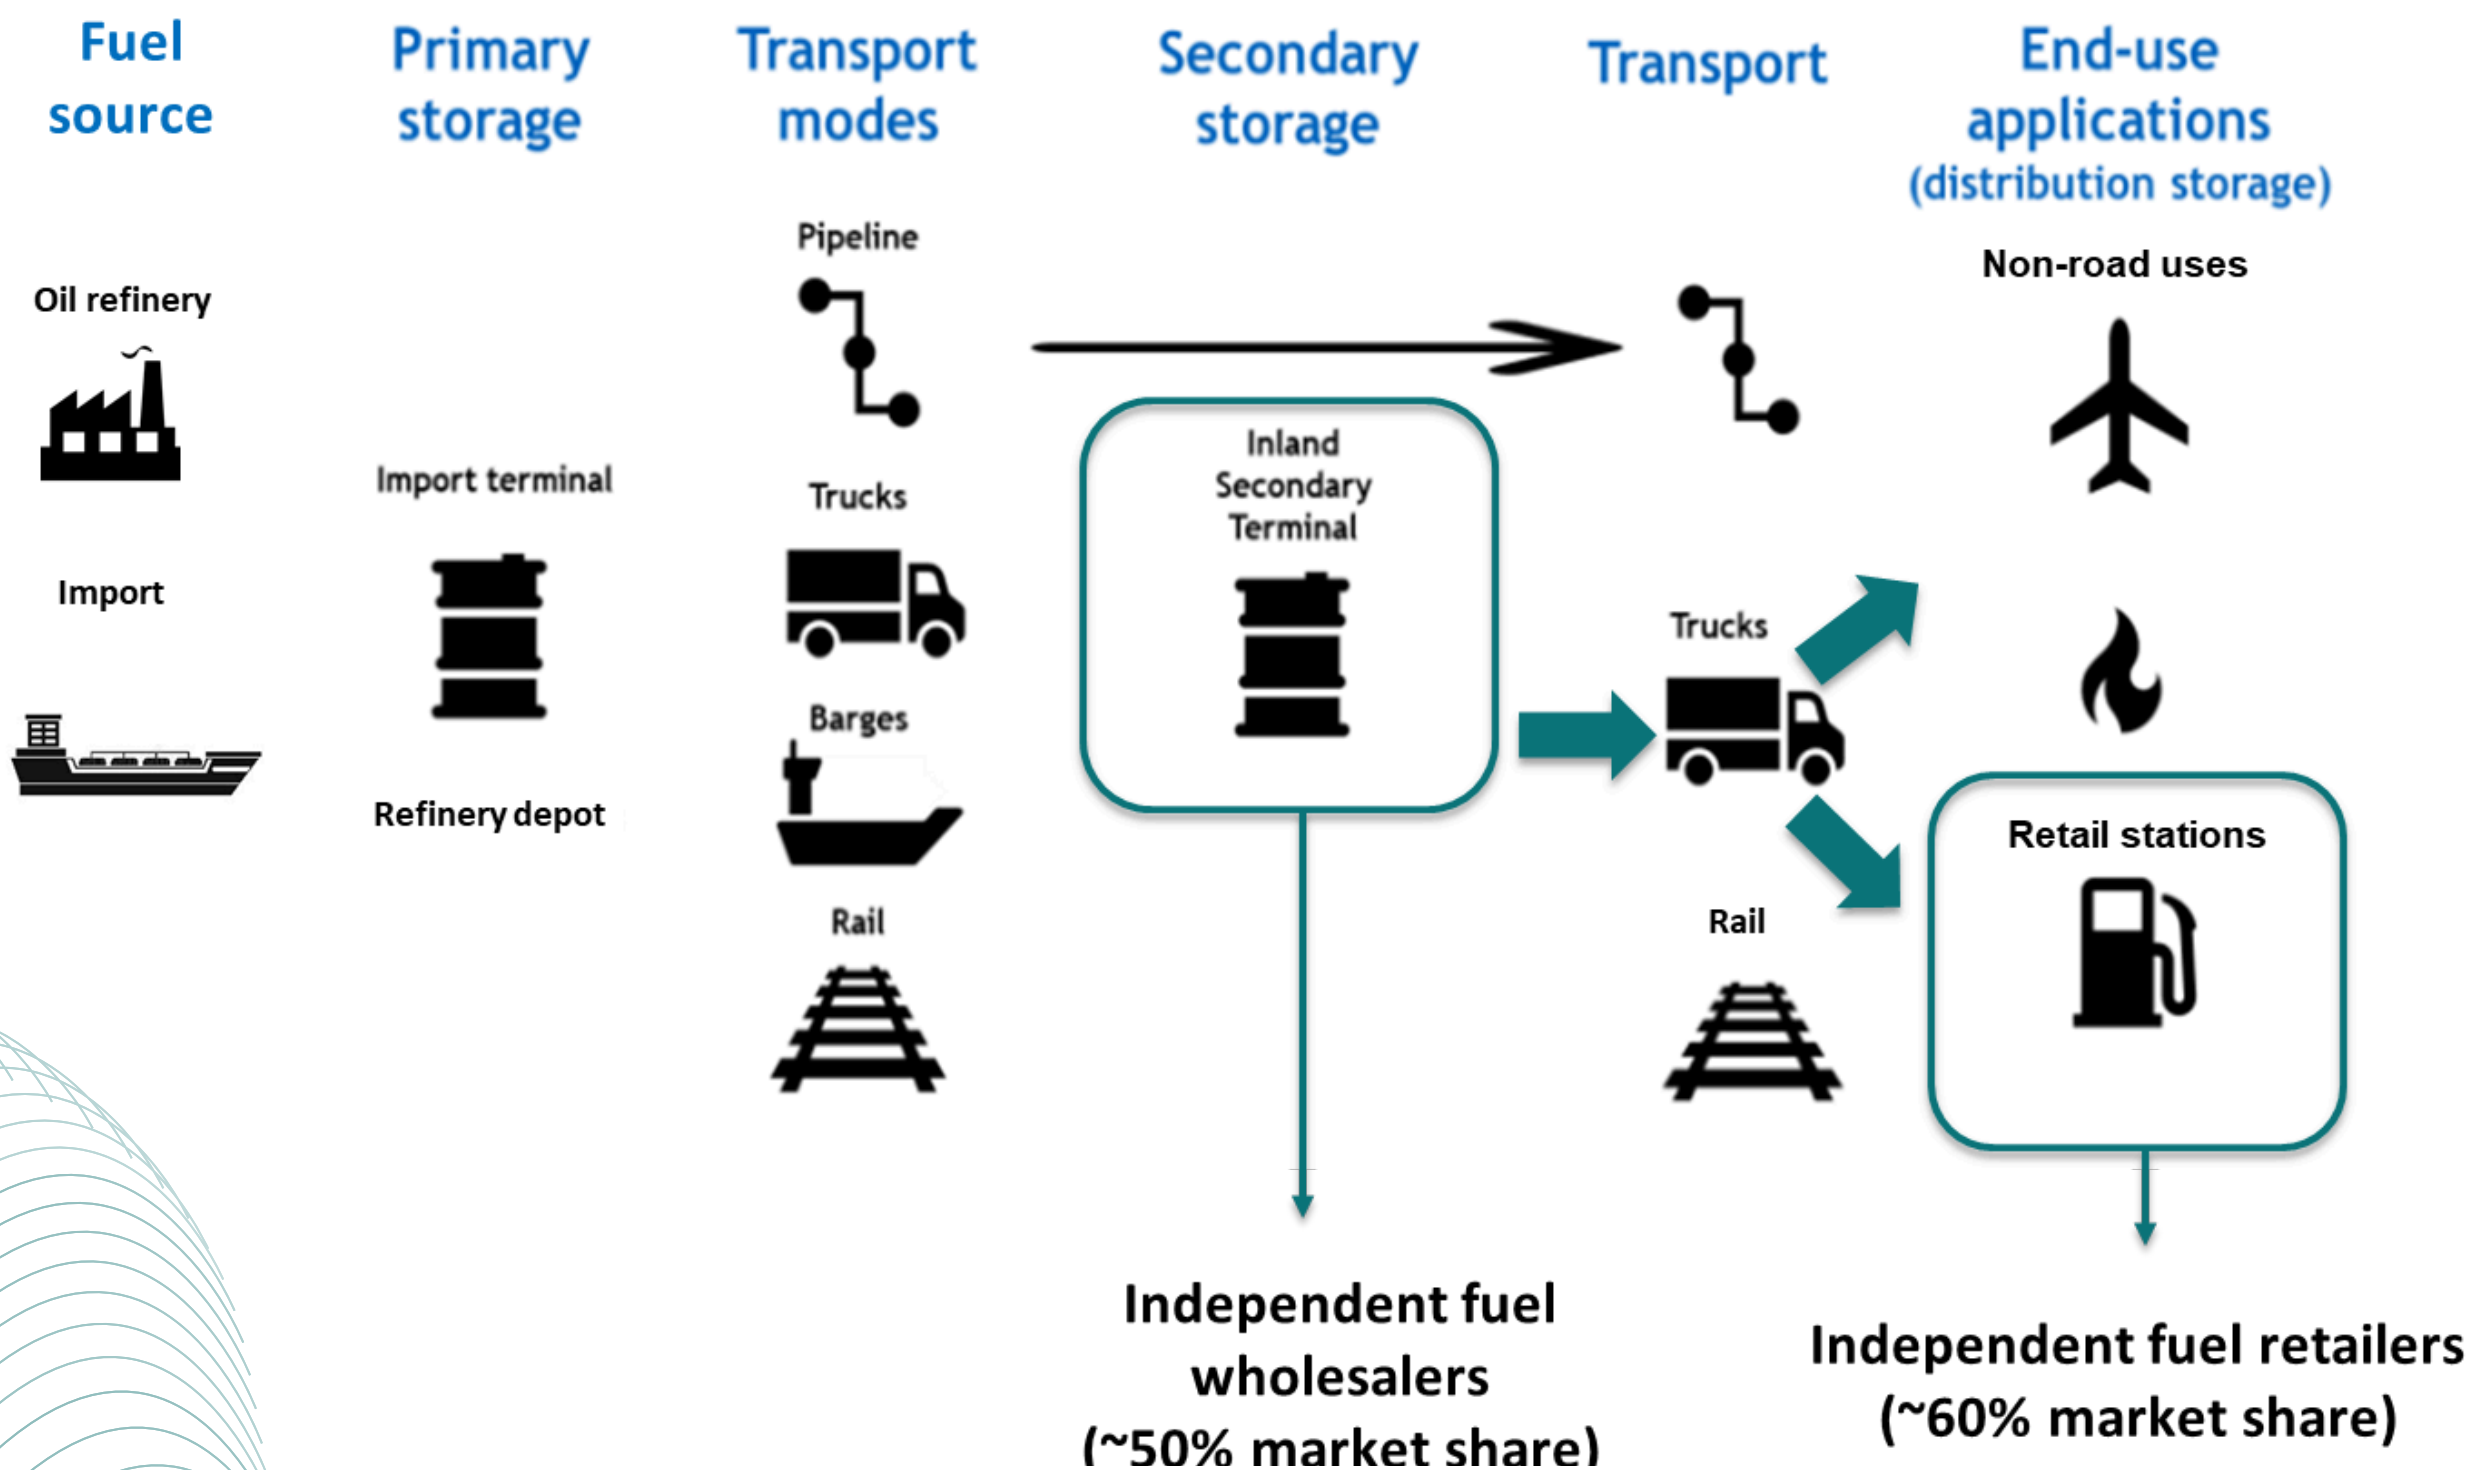

Energy Service Companies (E.S.Co) operating in the field of energy efficiency services.

Gaseous and liquefied low carbon fuels (LCF)

Production and sale, through any distribution channel, of gaseous and/or liquefied LCF for all uses.

We are the independent fuel suppliers in the national supply chain

Our mission

What we do

- We promote business development while respecting safety and consumer protection.
- We facilitate relationships among members for the study and resolution of common interest issues.
- We actively participate in all Commissions, Committees, and Working Groups established by Ministries, local Administrations, and competent Authorities.

Our shared principles

- Protection of the interests of our members;
- Orientation towards assisting, coordinating, and promoting the initiatives of members;
- Focus on a sustainable energy transition.

eFUEL- TODAY

As part of our commitment to a sustainable energy transition, recognizing the crucial role of low carbon fuels in the decarbonization of transportation, we have decided to join the eFUEL-TODAY campaign by bft, creating an Italian page with updates and clear information on e-fuels and biofuels (particularly HVO).

We are now looking for new partners to make this project grow!

Perché ci servono gli E-Fuels?

Gli E-Fuels hanno il potenziale per essere un pilastro fondamentale per l'offerta di energia sostenibile. I combustibili liquidi sono il mezzo più semplice ed efficiente per stoccare e trasportare l'energia per lunghe distanze. In settori come l'aviazione, la marina e l'industria chimica, inoltre, gli E-Fuels offrono delle prospettive eccezionali. Gli esperti concordano sul fatto che l'obiettivo di neutralità climatica potrà essere raggiunto solo con un mix energetico sostenibile e, in questo scenario, gli E-Fuels giocheranno un ruolo cruciale.
